[Header] What Makes A Top Deep Plane Facelift Surgeon?

The answer is simple.

Specialization.

The Deep Plane Facelift is the most advanced type of Facelift procedure.

Fewer than 5% of Plastic Surgeons are capable of performing this surgery.

Patients choose Dr. Taghva because of her rich expertise in the delicate complexities of the face and her warm personality.

Her exceptional results and raving reviews show this.

[Header] How Can A Facelift Achieve Beautiful, Balanced Results?

“Did you just get back from vacation or something?”

Over 90% of facelift patients receive compliments from other people about their appearance.

In truth, people can't tell that you've had a facelift.

Your friends and family will know you look great but don't know why.

With a Facelift, most patients say, “I want to look natural – I still want to look like myself.”

With the Deep Plane Facelift, you're going to.

This technique addresses the deep tissues of the face rather than focusing on the skin tension that causes the “pulled” or “windswept” appearance.

[Header] A Deep Plane Facelift Results In:

- A natural lift to the cheeks and midface

- Reduced smile lines
- Tightened jowls
- Contoured neck

Most facelift patients want a beautiful, natural, rejuvenated look.

To achieve this requires both artistic and medical talent from the surgeon.

[Header] Deep Plane Facelift FAQs

How long is the recovery? Dr. Taghva separates the skin from the underlying muscle and repositions both during a Deep Plane Facelift. This technique minimizes tissue trauma, resulting in less bruising and swelling, and promotes a smoother and faster recovery. We recommend only 7-14 days off work and 4-6 weeks for a complete recovery.

Will I have noticeable scarring? During a Deep Plane Facelift, incisions are around the ears and hairline. We will recommend proper aftercare instructions so any scarring becomes virtually undetectable.

What happens during a Deep Plane Facelift Consultation? Dr. Taghva will listen closely to your goals and concerns while evaluating your anatomy and skin quality. She will then use her expertise with facial rejuvenation to recommend a treatment plan tailored to you and your goals.

Has Dr. Taghva performed a Facelift on someone similar to me? Absolutely. She is renowned for her experience with customizing this procedure to help patients of different races, ethnicities, and ages.

“Grown up from a long line of family doctors, my intuitions knew what to look for when I was researching plastic surgeons. Dr. Taghva was the very first search result that came up and I instantly knew this was the right person that should be operating on me after my initial research. After my first procedure, I was very happy with the results and my following post-op months was painless.”

[Header] Meet Dr. Taghva, LEA Plastic Surgery

Goretti Ho Taghva, MD, is a board-certified plastic surgeon in Newport Beach specializing in facial rejuvenation procedures, including the Deep Plane Facelift.

She also prides herself in being one of the **only female** plastic surgeons specializing in Facial surgeries in the greater Los Angeles area. Dr. Taghva has a warm and empathetic presence, and her team is known for making her patients feel at ease upon the first interaction.

[Header] Why Choose Dr. Taghva?

Dr. Goretti Ho Taghva deeply understands the desired aesthetics and facial anatomy across many cultures, making her a top surgeon for patients of all races and ethnicities.

Dr. Taghva is highly skilled in cosmetic surgery and provides natural-looking changes that match each patient's goals, adding beauty and bringing facial harmony while preserving unique aesthetics.

Driven to deliver comprehensive facial rejuvenation, Dr. Taghva uses the Deep Plane Facelift technique to simultaneously address multiple facial aging concerns, including sagging cheeks, nasolabial folds, jowls, and skin laxity in the neck.
